

# MOJAVE REFINERY.

The Mojave Refinery invents an innovative recycling process that dismantles, modularizes, and assembles retired or decommissioned aircraft, sitting aimlessly at the Mojave Boneyard, into affordable housing solutions. The Mojave Refinery outlines a scalable model for addressing two important and persistent issues:

- (i) the increasing number of idle aircraft in boneyards
- (ii) the housing crisis in California and, more broadly, other hotspot regions around the world facing affordability challenges.

Transforming  
**Decommissioned  
Aircrafts**

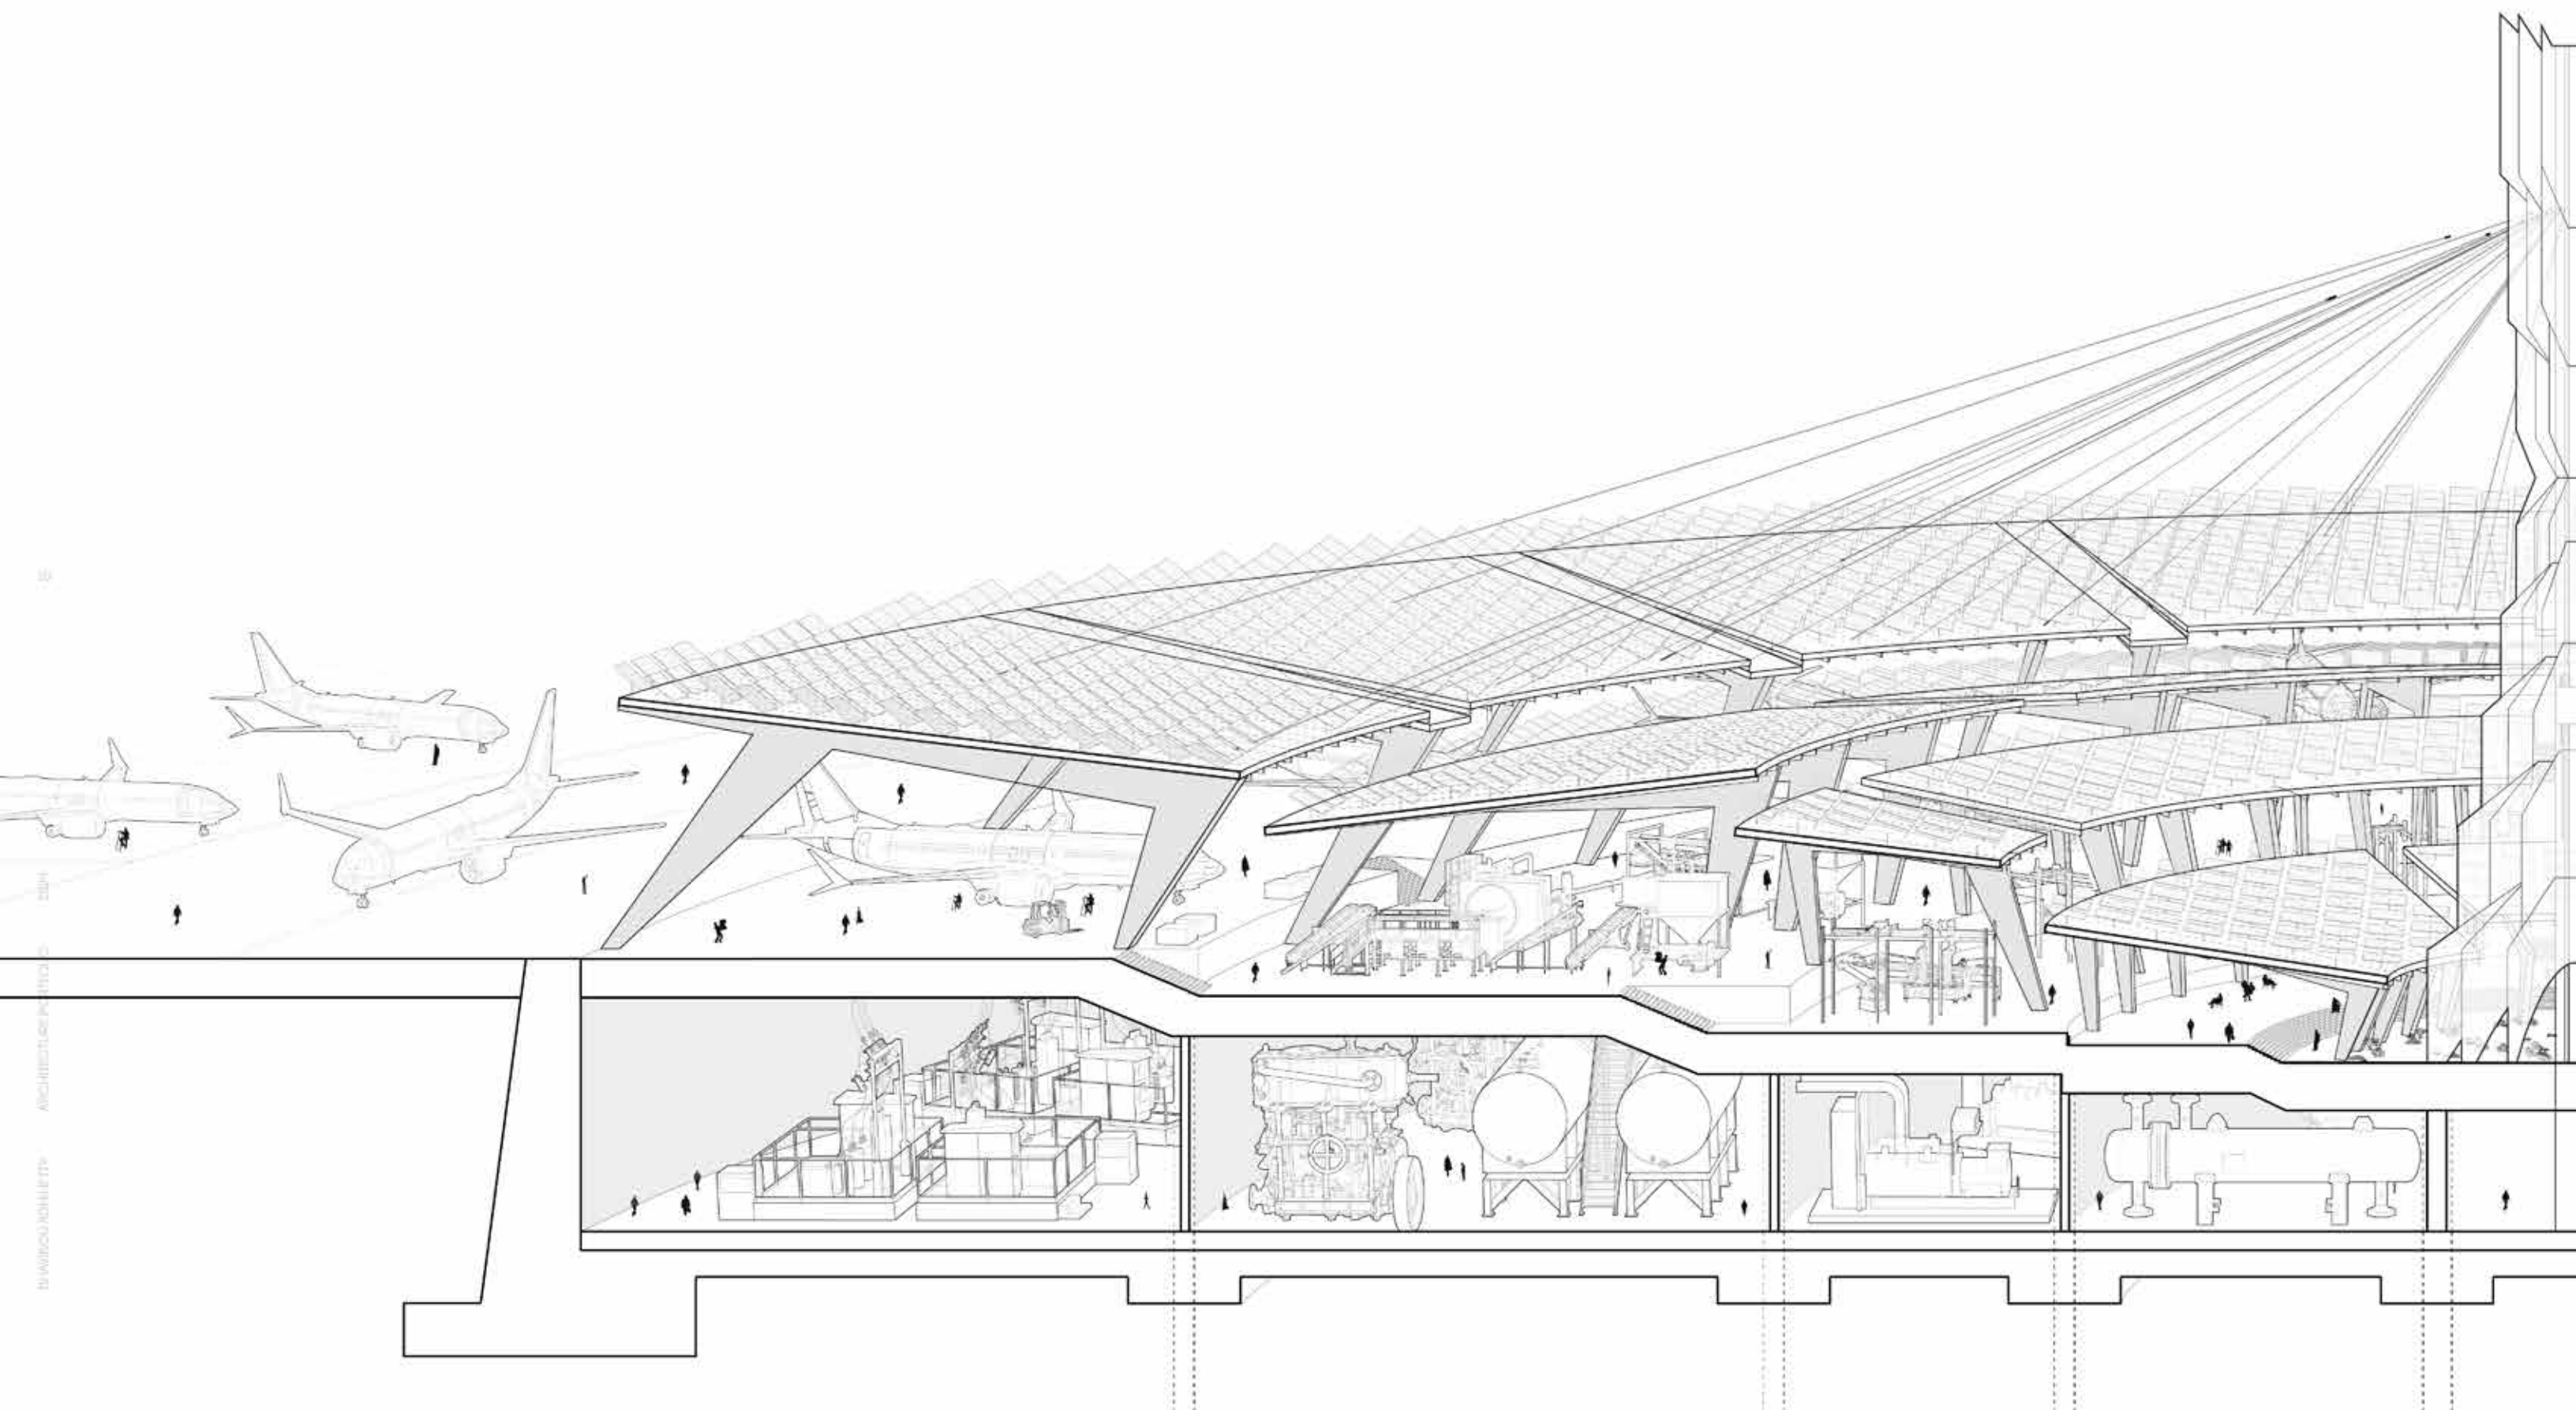

into  
**Affordable  
Housing.**
